INDEX TO AUTHORS.

A

- Abbott, A. C.** The significance of pathogenic spirilla in American surface waters, with a description of one isolated from the Schuylkill River at Philadelphia, i, 419
- The influence of acute alcoholism on the normal vital resistance of rabbits to infection, i, 447
- , and **Bergey, D. H.** Further studies upon the pathogenic spirilla of the Schuylkill River at Philadelphia, ii, 535
- Abbott, Maude E.** See **ADAMI, ABBOTT, and NICHOLSON**, iv, 349
- Abel, John J., and Davis, Walter S.** On the pigment of the negro's skin and hair, i, 361
- Adami, J. George, Abbott, Maude E., and Nicholson, F. J.** On the diplococcoid form of the colon bacillus, iv, 349
- Adler, I., and Meltzer, S. J.** Experimental contribution to the study of the path by which fluids are carried from the peritoneal cavity into the circulation, i, 482
- Studies in experimental atherosclerosis. A preliminary report, xx, 93
- Aldrich, Thomas B.** A chemical study of the secretion of the anal glands of *Mephitis mephitis* (common skunk) with remarks on the physiological properties of this secretion, i, 323
- , and **Jones, Walter.** α -Methylquinoline as a constituent of the secretion of the anal glands of *Mephitis mephitis*, ii, 439
- Alexander, Arthur C.** The rotary properties of some vegetable proteids, i, 304
- Allen, Dudley P., and Parker, Henry P.** Hydronephrosis of right kidney, congenital atresia of left ureter, and marked atrophy of left kidney, ix, 82
- Amberg, Samuel.** The cutaneous trichophytin reaction, xii, 435
- Amoss, Harold L.** See **LUCAS and AMOSS**, xiii, 486
- Organic matter in the expired breath with especial reference to its inhibiting power on oxidizing ferments, xvii, 132
- See **FLEXNER, CLARK, and AMOSS**, xix, 195
- See **FLEXNER, CLARK, and AMOSS**, xix, 205
- A note on the etiology of epidemic poliomyelitis, xix, 212
- See **CLARK and AMOSS**, xix, 217
- See **CLARK, FRASER, and AMOSS**, xix, 223
- See **FLEXNER and AMOSS**, xix, 411
- See **FLEXNER and AMOSS**, xx, 249
- Anderson, John F.** The influence of concentration (Gibson's

- method) on the presence of tetanus toxin in blood serum, xi, 656
- Apolant, H.** The question of athrepsia, xiv, 316
- Assersen, M. A.** See **PARK** and **WILLIAMS**, vii, 403
- Atkinson, James P.** See **PARK** and **ATKINSON**, iii, 513
- A preliminary note on the fractional precipitation of the globulin and albumin of normal horse's serum and diphtheric antitoxic serum, and the antitoxic strength of the precipitates, iv, 649
- See **Hiss** and **ATKINSON**, v, 47
- The fractional precipitation of the globulin and albumin of normal horse's serum and diphtheria antitoxic serum, and the antitoxic strength of the precipitates, v, 67
- Auer, John.** See **MELTZER** and **AUER**, vii, 59
- See **MELTZER** and **AUER**, viii, 692
- See **MELTZER** and **AUER**, x, 45
- See **MELTZER** and **AUER**, xi, 622
- See **MELTZER** and **AUER**, xii, 34
- , and **Lewis, Paul A.** The physiology of the immediate reaction of anaphylaxis in the guinea pig, xii, 151
- The effect of vagus section upon anaphylaxis in guinea pigs. Second communication, xii, 638
- , and **Meltzer, S. J.** On absorption from intramuscular tissue, xiii, 328
- The effect of salvarsan upon the heart in dogs, xiv, 248
- Lethal cardiac anaphylaxis in the rabbit, xiv, 476
- A note on salvarsan and acute anaphylaxis, xiv, 497
- , and **Meltzer, S. J.** The status of respiration in the methods of differential pressure compared with that under the method of intratracheal insufflation, xiv, 569
- , and **Van Slyke, Donald D.** A contribution to the relation between proteid cleavage products and anaphylaxis, xviii, 210
- , and **Robinson, G. Canby.** An electrocardiographic study of the anaphylactic rabbit, xviii, 450
- See **ROBINSON** and **AUER**, xviii, 556
- Austin, J. Harold, and Eisenbrey, A. B.** Experimental acute nephritis: the elimination of nitrogen and chlorides as compared with that of phenolsulphonethalein, xiv, 366
- See **PEARCE**, **AUSTIN**, and **KRUMBHAAR**, xvi, 363
- See **PEARCE**, **AUSTIN**, and **EISENBREY**, xvi, 375
- See **PEARCE**, **AUSTIN**, and **MUSSER**, xvi, 758
- See **PEARCE** and **AUSTIN**, xvi, 780
- See **FARR** and **AUSTIN**, xviii, 228
- , and **Pearce, Richard M.** The relation of the spleen to blood destruction and regeneration and to hemolytic jaundice. XI. The influence of the spleen on iron metabolism, xx, 122
- Austrian, Charles R.** The production of passive hypersensitivity to tuberculin, xv, 149

B

- Bachmann, George.** A physiologicopathological study of a case of heart block occurring in a dog as a result of natural causes, xvi, 25

- Baehr, George.** Glomerular lesions of subacute bacterial endocarditis, xv, 330
- Baer, W. S., Dawson, Percy M., and Marshall, H. T.** Regeneration of the dorsal root fibers of the second cervical nerve within the spinal cord, iv, 29
- Baeslack, F. W.** See CLOWES and BAESLACK, viii, 481
- Bailey, C. H.** Effects on titrations of inequality of sensitization of corpuscles, xv, 470
- Bailey, Frederick Randolph.** Studies on the morphology of ganglion cells in the rabbit. I. The normal nerve cells. II. Changes in the nerve cells in rabies, v, 549
- Balch, Alfred W.** See PFAFF and BALCH, ii, 49
- Baldwin, Helen.** An experimental study of oxaluria, with special reference to its fermentative origin, v, 27
- Banzhaf, Edwin J.** See GIBSON and BANZHAF, xii, 411
- Barbour, Henry G.** The constricting influence of adrenalin upon the human coronary arteries, xv, 404
- Bardeen, Charles R.** A study of the visceral changes in extensive superficial burns, ii, 501
- Barker, Bertha I.** See OPIE and BARKER, ix, 207
- The enzymes of fibrin, x, 343
- See OPIE and BARKER, x, 645
- The enzymes of fibrinous exudates. The effect of one enzyme upon another, x, 666
- See OPIE and BARKER, xi, 686
- See OPIE, BARKER, and DOCHIEZ, xiii, 162
- Barker, Lewellys F.** A case of circumscribed, unilateral, and elective sensory paralysis, i, 348
- Note on Dr. D. W. Montgomery's case of teratoma, iii, 284
- Bartlett, Willard.** An experimental study of the arteries in shock, xv, 415
- Bass, C. C., and Johns, Foster M.** The cultivation of malarial plasmodia (*Plasmodium vivax* and *Plasmodium falciparum*) *in vitro*, xvi, 567
- Beattie, James M.** A contribution to the bacteriology of rheumatic fever, ix, 186
- Beatty, W. A.** See LEVENE and BEATTY, viii, 461
- See LEVENE and BEATTY, viii, 463
- Beebe, S. P.** Cytotoxic serum produced by the injection of nucleoproteids, vii, 733
- Bergeim, Olaf, Stewart, F. T., and Hawk, P. B.** A study of the metabolism of calcium, magnesium, sulphur, phosphorus, and nitrogen in acromegaly, xx, 218
- , —, and —. Calcium metabolism after thyroparathyroidectomy, xx, 225
- Bergey, D. H.** See ABBOTT and BERGEY, ii, 535
- Bernheim, B. M.** See WHIPPLE, STONE, and BERNHEIM, xvii, 286
- See WHIPPLE, STONE, and BERNHEIM, xvii, 307
- See WHIPPLE, STONE, and BERNHEIM, xix, 144
- See WHIPPLE, STONE, and BERNHEIM, xix, 166
- Berry, Jane L.** See PARK and WILLIAMS, vii, 403
- and Mann, A. The complement binding test in rabies, xii, 338
- Beyer, Henry G.** The influence of exercise on growth, i, 546
- Bigelow, J. E.** See KING, BIGELOW, and PEARCE, xiv, 159

- Bispham, W. N.** See SIMON, LAMAR and BISPHAM, viii, 651
- Bliss, C. L., and Novy, F. G.** Action of formaldehyde on enzymes and on certain proteids, iv, 47
- Boehm, Emil.** See HASTINGS and BOEHM, xvii, 239
- Boggs, Thomas R., and Morris, Roger S.** Experimental lipemia in rabbits, xi, 553
- Bolduan, C.** See PARK and WILLIAMS, vii, 403
- Bolton, B. Meade, and Herbert D.** The production of antitoxin by the passage of electricity through diphtheria cultures, i, 537
- Diphtheria antitoxin sometimes found in the blood of horses that have not been injected with toxin, i, 543
- Bond, G. S.** Effect of various agents on the blood flow through the coronary arteries and veins, xii, 575
- Borden, John Harvey.** See HISS, BORDEN, and KNAPP, vii, 547
- Bowman, Fred B.** See EVANS, BOWMAN, and WINTERITZ, xix, 283
- Bradley, W. I.** On hemorrhagic cysts of the thyroid gland, i, 401
- Briggs, C. E.** See SOLLMANN, WILLIAMS, and BRIGGS, ix, 71
- Brill, N. E., and Libman, E.** A contribution to the subjects of chronic interstitial nephritis and arteritis in the young and family nephritis; with a note on calcification in the liver, iv, 541
- Bronfenbrenner, Jacob.** See NOGUCHI and BRONFENBRENNER, xiii, 43
- See NOGUCHI and BRONFENBRENNER, xiii, 69
- See NOGUCHI and BRONFENBRENNER, xiii, 78
- See NOGUCHI and BRONFENBRENNER, xiii, 92
- See NOGUCHI and BRONFENBRENNER, xiii, 210
- See NOGUCHI and BRONFENBRENNER, xiii, 217
- See NOGUCHI and BRONFENBRENNER, xiii, 229
- and NOGUCHI, HIDEYO. A biochemical study of the phenomena known as complement-splitting. I. Splitting of the complement associated with globulin precipitation, xv, 598
- , and —. A biochemical study of the phenomena known as complement-splitting. II. Splitting of the complement without a visible alteration of the proteid constituents, xv, 625
- See MANWARING and BRONFENBRENNER, xviii, 601
- Brooks, Clyde.** A note on the absence of adrenalin in malignant renal hypernephromas, xiv, 550
- Brooks, Harlow, and Crowell, B. S.** Concerning the relation of the coagulation time of the blood to thrombosis in phlebitis, x, 271
- Brown, E. D.** See SOLLMANN and BROWN, vi, 207
- Brown, G. L.** See KNOX, MOSS, and BROWN, xii, 562
- Brown, Thomas R.** Studies on trichinosis, with especial reference to the increase of the eosinophilic cells in the blood and muscle, the origin of these cells, and their diagnostic importance, iii, 315
- Brown, Wade H.** Observations on the origin, distribution and significance of fuchsin bodies, with special staining technique, xii, 533
- Changes in the hemosiderin content of the rabbit's liver during autolysis, xii, 623

- . Malarial pigment (so called melanin): its nature and mode of production, xiii, 290
- . The value of hydrogen peroxide in the microchemical determination of iron, xiii, 477
- . See BUNTING and BROWN, xiv, 445
- . The relation of hematin to pathological pigment formation, xiv, 612
- . Malarial pigment (hematin) as a factor in the production of the malarial paroxysm, xv, 579
- . Malarial pigment (hematin) as an active factor in the production of the blood picture of malaria, xviii, 96
- , and Loevenhart, A. S. The effect of hematin on the circulation and respiration, xviii, 107
- . The histogenesis of blood platelets, xviii, 278
- . A note on the pathogenicity of *Trypanosoma lewisi*, xix, 406
- . Morphological and developmental anomalies of a pathogenic strain of *Trypanosoma lewisi* and their relation to its virulence, xix, 562
- Buckley, S. S.** See MACCALLUM and BUCKLEY, vi, 65
- Buerger, Leo.** Studies of the pneumococcus and allied organisms with reference to their occurrence in the human mouth, vii, 497
- . The differentiation of streptococci by means of fermentative tests, ix, 428
- , and Oppenheimer, Adèle. Bone formation in sclerotic arteries, x, 354
- Bulkley, Kenneth.** See CECIL and BULKLEY, xv, 225
- Bull, Carroll G.** See JOBLING and BULL, xvi, 483
- . See JOBLING and BULL, xvii, 61
- . See JOBLING and BULL, xvii, 453
- . A method for estimating the bacteria in the circulating blood in rabbits, xx, 237
- Bullock, F. D., and Rohdenburg, G. L.** Cell proliferation and parasites in rats, xvi, 527
- Bunting, C. H.** Congenital cystic kidney and liver with family tendency, viii, 271
- . The formation of true bone with cellular (red) marrow in a sclerotic aorta, viii, 365
- . Experimental anemias in the rabbit, viii, 625
- . Blood platelet and megakaryocyte reactions in the rabbit, xi, 541
- , and Brown, Wade H. The pathology of intraperitoneal bile injections in the rabbit, xiv, 445
- , and Jones, A. P. Intestinal obstruction in the rabbit, I, xvii, 192
- and — . Intestinal obstruction in the rabbit, II, xviii, 25
- Burnett, Theodore C.** See ROBERTSON and BURNETT, xvii, 344
- Burns, R. L.** See STEWART, GUTHRIE, BURNS, and PIKE, viii, 289
- Burr, Charles W., and McCarthy, D. J.** Acute internal hydrocephalus. A clinical and pathological study, v, 195
- Burrows, Montrose T.** See EYSTER, BURROWS, and ESSICK, xi, 489
- . See CARREL and BURROWS, xiii, 387
- . See CARREL and BURROWS, xiii, 416
- . See CARREL and BURROWS, xiii, 562
- . See CARREL and BURROWS, xiii, 571
- . See CARREL and BURROWS, xiv, 244

- Burton-Opitz, R.** The effect of changes in temperature upon the viscosity of the "living" blood, viii, 59
- , The effect of intravenous injection of solutions of dextrose upon the viscosity of the blood, viii, 240
- , and **Meyer, Gustave M.** Effects of intravenous injections of radium bromide, viii, 245
- , and **Wolf, H. F.** The changes in the venous blood flow on administration of amyl nitrite, xii, 278
- , and **Lucas, Daniel R.** The blood supply of the kidney. V. The influence of the vagus nerve upon the vascularity of the left organ, xiii, 308
- Butterfield, E. E., and Peabody, Francis W.** The action of pneumococcus on blood, xvii, 587
- Buxton, B. H.** See **TEAGUE and BUXTON**, ix, 254
- C**
- Cabot, Follen.** Report of experimental work on the dilution method of immunization from rabies, iv, 181
- Calkins, Gary N.** The so called rhythms of growth energy in mouse cancer, x, 283
- Capps, J. A., and Smith, J. F.** Experiments on the leukolytic action of the blood serum of cases of leukemia treated with x-ray and the injection of human leukolytic serum in a case of leukemia, ix, 51
- Carrel, Alexis.** Heterotransplantation of blood vessels preserved in cold storage, ix, 226
- , Transplantation in mass of the kidneys, x, 98
- , Calcification of the arterial system in a cat with transplanted kidneys, x, 276
- , Peritoneal patching of the aorta, xii, 139
- , Remote results of the replantation of the kidney and the spleen, xii, 146
- , Latent life of arteries, xii, 460
- , and **Burrows, Montrose T.** Cultivation of tissues *in vitro* and its technique, xiii, 387
- , and —, Cultivation *in vitro* of the thyroid gland, xiii, 416
- , and —, On the physicochemical regulation of the growth of tissues. The effects of the dilution of the medium on the growth of the spleen, xiii, 562
- , and —, Cultivation *in vitro* of malignant tumors, xiii, 571
- , The ultimate result of a double nephrectomy and the replantation of one kidney, xiv, 124
- , Patching of the abdominal aorta with a piece of rubber, xiv, 126
- , and **Burrows, Montrose T.** An addition to the technique of the cultivation of tissues *in vitro*, xiv, 244
- , and **Ingebrigtsen, Ragnvald.** The production of antibodies by tissues living outside of the organism, xv, 287
- , Ultimate results of aortic transplantations, xv, 389
- , Technique for cultivating a large quantity of tissue, xv, 393
- , On the permanent life of tissues outside of the organism, xv, 516
- , Permanent intubation of the thoracic aorta, xvi, 17
- , Pure cultures of cells, xvi, 165
- , Artificial activation of the growth *in vitro* of connective tissue, xvii, 14

- . Concerning visceral organisms, xviii, 155
- . Contributions to the study of the mechanism of the growth of connective tissue, xviii, 287
- . Present condition of a strain of connective tissue twenty-eight months old, xx, 1
- . See TUFFIER and CARREL, xx, 3
- . Experimental operations on the sigmoid valves of the pulmonary artery, xx, 9
- Carroll, James.** See REED and CARROLL, v, 215
- Carter, Edward Perkins.** A note upon the technique and accuracy of the method of Douglas and Haldane for calculating the dead space in breathing, xx, 81
- Carter, William S.** See WOOD and CARTER, ii, 131
- Cary, Edward G.** See ZINSSER and CARY, xix, 345
- Cecil, Russell L.** A study of the pathological anatomy of the pancreas in ninety cases of diabetes mellitus, xi, 266
- . Concerning adenomata originating from the islands of Langerhans, xiii, 595
- . On hypertrophy and regeneration of the islands of Langerhans, xiv, 500
- , and **Bulkley, Kenneth.** On the lesions produced in the appendix by *Oxyuris vermicularis* and *Trichocephalus trichiura*, xv, 225
- . The effect of certain experimental procedures on the islands of Langerhans, xvi, 1
- Celler, H. L.** See MANDLEBAUM and CELLER, x, 308
- Cheesman, T. M., and Meltzer, S. J.** An experimental study of the direct inoculation of bacteria into the spleen of living animals; and a contribution to the knowledge of the importance of a lesion in animal tissue for the lodgment and multiplication of bacteria within it, iii, 533
- Chickering, Henry T.** Agglutination phenomena in lobar pneumonia, xx, 599
- Chittenden, R. H., and Gies, William J.** The mucin of white fibrous connective tissue, i, 186
- Christian, Henry A.** Multiple myeloma: a histological comparison of six cases, ix, 325
- Christman, P. W.** See WHIPPLE and CHRISTMAN, xx, 297
- Churchman, John W.** The selective bactericidal action of gentian violet, xvi, 221
- , and **Michael, W. Howard.** The selective action of gentian violet on closely related bacterial strains, xvi, 822
- . The selective bactericidal action of stains closely allied to gentian violet, xvii, 373
- . The selective bactericidal action of methylene blue, xviii, 187
- , and **Herz, Lucius Felix.** The toxicity of gentian violet and its fate in the animal body, xviii, 579
- Clark, H. L.** See CONANT and CLARK, i, 341
- Clark, Paul F.** See HOWARD and CLARK, xvi, 850
- . See FLEXNER and CLARK, xvii, 577
- . See FLEXNER, CLARK, and AMOSS, xix, 195
- . See FLEXNER, CLARK, and AMOSS, xix, 205
- , and **Amoss, Harold L.** Intraspinal infection in experimental poliomyelitis, xix, 217
- , **Fraser, Francis R., and Amoss, Harold L.** The relation to the

- blood of the virus of epidemic poliomyelitis, xix, 223
- Claypole, Edith J.** On the classification of the streptothrices, particularly in their relation to bacteria, xvii, 99
- Clowes, George H. A., and Baeslack, F. W.** On the influence exerted on the virulence of carcinoma in mice by subjecting the tumor materials to incubation previous to inoculation, viii, 481
- Codman, Ernest Amory.** Experiments on the application of the Roentgen rays to the study of anatomy, iii, 383
- Coffen, T. Homer.** See MEARA, COFFEN, and CREHORE, xvi, 280
- Cohen, Martin.** See NOGUCHI and COHEN, xviii, 572
- Cohn, Alfred E.** Auricular tachycardia with a consideration of certain differences between the two vagi, xv, 49
- On the differences in the effects of stimulation of the two vagus nerves on rate and conduction of the dog's heart, xvi, 732
- The effect of morphine on the mechanism of the dog's heart after removal of one vagus nerve, xviii, 715
- , and **Lewis, Thomas.** The predominant influence of the left vagus nerve upon conduction between the auricles and ventricles in the dog, xviii, 739
- Cole, Rufus.** Toxic substances produced by pneumococcus, xvi, 644
- Pneumococcus hemotoxin, xx, 346
- The production of methemoglobin by pneumococci, xx, 363
- Collins, Katharine R.** The application of the reaction of agglutination to the pneumococcus, vii, 420
- The production of agglutinins in the animal body by the inoculation of substances other than products of bacterial origin, x, 529
- Colwell, H. S.** See SPRUNT, COLWELL, and HAGAN, xvi, 607
- Conant, F. S., and Clark, H. L.** On the accelerator and inhibitory nerves to the crab's heart, i, 341
- Cooke, Jean V.** The excretion of calcium and magnesium after parathyroidectomy, xii, 45
- Changes in nitrogenous metabolism after parathyroidectomy, xiii, 439
- Corper, Harry J.** Correlation of the histological and chemical changes in the spleen during necrosis and autolysis, xv, 429
- Councilman, W. T.** See LOVETT and COUNCILMAN, ii, 427
- Acute interstitial nephritis, iii, 393
- Couret, Maurice.** The behavior of *Bacillus lepræ* in cold-blooded animals, xiii, 576
- See DUVAL and COURET, xv, 292
- , and **Walker, James.** The cultivation of amebæ in pure culture upon autolyzed tissues, xviii, 252
- Cowie, D. Murray.** A preliminary report on acid-resisting bacilli, with special reference to their occurrence in the lower animals, v, 205
- Craig, Charles F.** The branched form of the *Bacillus tuberculosis* in sputum, iii, 363
- Observations upon the Noguchi modification of the Wassermann

- complement fixation test in the diagnosis of lues in the military service, xii, 726
- The relation of certain bacteria to non-specific reactions with the complement fixation test for lues, xiii, 521
- , and **Nichols, Henry J.** A study of complement fixation in syphilis with spirochæta culture antigens, xvi, 336
- Craster, C. V.** Conditions governing the growth of displaced normal tissue, xvi, 493
- The recognition of the cholera vibrio, xix, 581
- Crehore, Albert C., and Meara, Frank S.** The micrograph. An instrument which records the microscopic movements of a diaphragm by means of light interference, and some records of physiological events showing the registration of sound waves, including the human voice, xiii, 616
- A study of simultaneous tracings from the apex of the heart and the radial artery with the micrograph, xiv, 339
- A study of tracings from the region near the apex of the heart, xiv, 351
- On the distribution and direction of motion of the interference bands of light formed by thin plates as the thickness of the plate varies, xiv, 357
- A study of the presphygmie period with the micrograph, xiv, 520
- See **MEARA, COFFEN, and CREHORE**, xvi, 280
- Crile, George, and Dolley, David H.** An experimental research into the resuscitation of dogs killed by anesthetics and asphyxia, viii, 713
- and — On the effect of complete anemia of the central nervous system in dogs resuscitated after relative death, x, 782
- Crowell, B. S.** See **BROOKS and CROWELL**, x, 271
- Cunningham, R. H.** Experimental thyroidism, iii, 147
- Curry, Joseph J.** *Bacillus capsulatus* (*Bacillus pneumoniae* of Friedländer?) with especial reference to its connection with acute lobar pneumonia. A report of twelve cases in which *Bacillus capsulatus* occurred in the medical and surgical wards of the Boston City Hospital, iv, 169
- Cushing, Harvey, and Sladen, Frank J.** Obstructive hydrocephalus following cerebrospinal meningitis, with intraventricular injection of antimeningitis serum (Flexner), x, 548
- Cushny, Arthur R.** On the action of piperidine and some of its compounds, i, 202
- On the action of substances of the digitalis series on the circulation in mammals, ii, 233
- On the interpretation of pulse tracings, iv, 327

D

- Darling, Samuel T.** The morphology of the parasite (*Histoplasma capsulatum*) and the lesions of histoplasmosis, a fatal disease of tropical America, xi, 515
- Experimental sarcosporidiosis in the guinea pig and its relation to a case of sarcosporidiosis in man, xii, 19
- Strongyloides infections in man and animals in the Isthmian Canal Zone, xiv, 1
- Experimental infection of the mule with *Trypanosoma hipp-*

- cum* by means of *Musca domestica*, xv, 365
- The infection of mules by *Trypanosoma hippicum* through mucous membranes, xv, 367
- The immunization of large animals to a pathogenic trypanosome (*Trypanosoma hippicum* (Darling)) by means of an avirulent strain, xvii, 582
- Davis, Walter S.** See ABEL and DAVIS, i, 361
- Dawson, Percy M.** See BAER, DAWSON, and MARSHALL, iv, 29
- The changes in the heart rate and blood "pressures" resulting from severe hemorrhage and subsequent infusion of sodium bicarbonate, vii, 1
- , and **Gorham, Lemuel W.** The pulse pressure as an index of the systolic output, x, 484
- Delatour, B. J.** See SYDENSTRICKER, DELATOUR, and WHIPPLE, xix, 536
- Denis, W.** See GURD and DENIS, xiv, 606
- See FOLIN, KARSNER, and DENIS, xvi, 789
- See KARSNER and DENIS, xix, 259
- See KARSNER and DENIS, xix, 270
- De Sautelle, W. T.** See GREY and DE SAUTELLE, xi, 659
- DeWitt, Lydia M.** Morphology and physiology of areas of Langerhans in some vertebrates, viii, 193
- Dixon, Robert L.** The effects of Roentgen irradiation upon the changes in the cell content of the blood and lymph induced by injections of pilocarpin, xi, 453
- The effects of splenectomy upon the cell content of the thoracic duct lymph in the dog, and its relation to the action of pilocarpin, xv, 63
- Some observations of the thoracic duct lymph after injection of oil of turpentine into the peritoneal cavity of the dog, xvi, 139
- Dochez, A. R.** Proteolytic enzymes and anti-enzymes of normal and pathological cerebrospinal fluids, xi, 718
- Intracellular proteolytic enzymes of liver, xii, 666
- See OPIE, BARKER, and DOCHEZ, xiii, 162
- The presence of protective substances in human serum during lobar pneumonia, xvi, 665
- The occurrence and virulence of pneumococci in the circulating blood during lobar pneumonia and the susceptibility of pneumococcus strains to univalent antipneumococcus serum, xvi, 680
- Coagulation time of the blood in lobar pneumonia, xvi, 693
- Dolley, David H.** See CRILE and DOLLEY, viii, 713
- See CRILE and DOLLEY, x, 782
- A note on nitrous oxide as an anesthetic in animal experimentation, xix, 372
- Donhauser, J. L.** The human spleen as an hematoplastic organ, as exemplified in a case of splenomegaly with sclerosis of the bone marrow, x, 559
- See LONGCOPE and DONHAUSER, x, 618
- Draper, George.** See ROBINSON and DRAPER, xiv, 217
- See ROBINSON and DRAPER, xv, 14
- , and **Hanford, John M.** Experiments on the transmission of scarlet fever to the lower monkeys, xvii, 517
- Dresbach, Melvin.** On the toxicity of normal urine, v, 315

- Duke, W. W.** The rate of regeneration of blood platelets, xiv, 265
- Durham, Herbert E.** Some theoretical considerations upon the nature of agglutinins together with further observations upon *Bacillus typhi abdominalis*, *Bacillus enteritidis*, *Bacillus coli communis*, *Bacillus lactis aerogenes*, and some other bacilli of allied character, v, 353

INDEX TO SUBJECTS.

A

Abdomen:
Teratoma of, iii, 259

Abrin:
Histological changes produced by, ii, 197

Abscess:
Sporothrix schenckii causing, v, 77
Tissue solution with, viii, 536
Typhoid, ix, 1

Absorption:
Adrenalin, xviii, 190
Arsenic, from salvarsan, xvii, 83
Barium sulphate, in syphilis, xiii, 217
Caffeine, influence of, on, xii, 510
Coagulated serum, absorption of, iii, 573
Intestinal, in infantilism, xvii, 199
—, in obstruction, xix, 166
Intramuscular tissue, vii, 59; xiii, 328
Nephrectomy and lesions of uranium nitrate, influence of, on, xii, 487
Peritoneal, i, 482
—, adrenalin and calcium chloride influence on, xii, 288
Strychnine and hydrocyanic acid, i, 529

Accelerator nerve:

See Nerve.

Acid:
Agglutination of pneumococci, xix, 28
Amino-, as media for leprosy bacillus, xiii, 365

Acid—continued:

Amino-, phosphotungstates of, viii, 463

Bacteria, acid produced by, iii, 651

Boric, effect of, on phagocytosis, ix, 473

Butyric, test for syphilis, xi, 604

Carbolic, effect of, on phagocytosis, ix, 473

Fatty, hemolysis by, xiii, 380
—, hemolytic properties of, in pernicious anemia, xviii, 527

—, staining of, viii, 322

—, and venom activators, ix, 436

Glycothionic, x, 557

Glycuronic, excretion in pneumococcus infections, xviii, 259

Hydrocyanic, absorption of, i, 529

Intoxication of diabetes, v, 617

Media, growth of tissue in, xviii, 183

Phosphotungstic, hematoxylin stain, ii, 529

—, — — for neuroglia fibers, v, 15

—, resisting bacilli, v, 205

Salicylic, influence of, on uricolysis, ix, 312

Uric, in intestinal infantilism, xv, 107

Aconitin:

Heart, action on, of, ii, 593

Acromegaly:

Metabolism in, xx, 218

Actinosphærium:

eichorni, physiological degeneration of, x, 207

Activator:

Venom, viii, 87; ix, 436

Addison's disease:

See Disease.

Adenitis:

Tubercle bacilli in, xi, 403
Tuberculous cervical, xii, 82

Adenoma:

Islands of Langerhans, adenomata originating from, xiii, 595

Adipose:

Tissue, iii, 585

Adrenal:

Adrenalin index of, xix, 536
Atrophy, iv, 581
Lesions, x, 735

Adrenalin:

See Epinephrin.

Aerogenes capsulatus:

See Bacillus aerogenes capsulatus.

Age:

Tetany in relation to, xix, 89

Agent:

Filterable, sarcoma variations caused by, xvii, 219
—, tumors of chicken, caused by, xviii, 651; xix, 52

Agglutination:

Intraperitoneal insertion of celloidin capsules containing bacilli, agglutinations obtained by, v, 635
Intravascular, xiii, 425
Mass cultures for, vii, 223
Pertussis, agglutination in, vii, 335
Pneumococcus, vii, 420; xix, 28
Pneumonia, agglutination in, xx, 599
Temperature effect upon, viii, 337

Agglutinin:

Electrical charge of, ix, 222
Nature of, v, 353
Production of, x, 529
Treponema pallidum, agglutinins for, xviii, 18

Agitation:

Effect of, on complement, xiii, 229

Air:

Passages, aspiration of foreign material into, xiii, 626
—, tubercle bacilli introduced into, xvii, 527

Albumin:

Diphtheria antitoxin, albumin in, iv, 649; v, 47; v, 67
Egg, injection of, vi, 207
Precipitation of, iv, 649; v, 67
Urinary, composition of, xiv, 298

Albuminolysin:

Precipitins and, xv, 529; xviii, 219

Albuminuria:

Cyclic, v, 647
Physiological, iii, 137

Alcohol:

Extracts of tissue used for antigens, xviii, 75
Nerve cell poisoning by, i, 623

Alcoholism:

Infection and, i, 447

Alloxuric:

Excretion in leukopenia, v, 541

Amanita:

phalloides, toxicology of, viii, 437

Amaurotic family idiocy:

See Idiocy.

Amboceptor:

Syphilis, amboceptors in, xiii, 78

Ameba:

coli, stain for, ii, 529
Cultivation of, xviii, 252

- Ameboid body:**
See Body.
- Amino-acid:**
See Acid.
- Ammocoetes:**
branchialis, metamorphosis of
thyroid of, xvii, 379
- Amyl nitrite:**
Venous blood flow, changes
from, xii, 278
- Amylaceous body:**
See Body.
- Amyloid:**
Substance in syphilitic bone
tumors, v, 111
- Amylolytic ferment:**
See Ferment.
- Anaerobe:**
Method for plating anaerobic
organisms, viii, 542
- Anal gland:**
See Gland.
- Anaphylatoxin:**
Formation of, xx, 37
Immunization of animals with,
xx, 387
Typhoid bacillus, xvii, 117
Virulence and, xx, 582
- Anaphylaxis:**
Heart beat in, xviii, 556
Horse serum, x, 608
Intoxication of, xii, 586
Lethal cardiac, xiv, 476
Lipoids in, xx, 468
Physiology of reaction to,
xii, 151
Protein cleavage products and,
xviii, 210
Salvarsan and acute, xiv, 497
Studies in, xiv, 44; xvi, 349
—, electrocardiographic, in,
xviii, 450
Toxic action of normal sera in
relation to, xiv, 25
Vagus section, effect of, upon,
xii, 638
- Anastomosis:**
Arteriovenous, xiii, 24
- Anastomosis—continued:**
Portal vein and vena cava in-
ferior, vii, 163
- Anatomy:**
Pathological, of hydrazine poi-
soning, x, 457
—, of malaria, vi, 119
—, of pancreas in diabetes,
xi, 266
Roentgen rays in, iii, 383
- Anemia:**
Blood flow in hands in,
xviii, 113
Cerebral, return of nerve func-
tion after, x, 490
Experimental,
viii, 625; xviii, 113
Nervous system,
x, 782; xi, 257
Pernicious, toxic hemolysis of,
xviii, 527
Phagocytes, increase of, in,
x, 78
Post-hemorrhagic, xvi, 325
Uncinariasis, anemia in,
xi, 331
- Anesthesia:**
Chloroform, and pregnancy,
xv, 246
Glycosuria following ether,
xvi, 178
Research upon, ii, 131
- Anesthetic:**
Nitrous oxide, xix, 372
Resuscitation of dogs killed
by, viii, 713
- Aneurysm:**
Treatment of, iii, 371
- Angioma:**
Heart, x, 368
- Aniline:**
Dyes in culture media,
xix, 20; xix, 501
- Anomaly:**
Muscle, in dermatomyositis,
vi, 407
Trypanosoma lewisi, anoma-
lies of, xix, 562

Antibody:

- Auto-, formation, xi, 695
- Formation by tissues outside of organism, xv, 287
- Parabiosis as a test for antibodies in cancer, xi, 810
- Tetanophil receptor of erythrocytes, antibody for, vii, 351

Anti-enzyme:

- Cerebrospinal fluid, xi, 718
- Chloroform and phosphorus poisoning, xiii, 162
- Exudate, inflammatory, vii, 316

Antigen:

- Casein, antigenic properties of split products of, xvi, 470
- , antigenic properties of protein compounded with, xvi, 479
- Caseinate, globin, antigenic properties of, xvii, 535
- Polyvalent, *Streptococcus viridans*, xx, 72
- Spirochæta culture, xvi, 336
- Syphilis, xiii, 43
- Wassermann reaction, xviii, 75

Antihemolysis:

xi, 695

Antileukoprotease:

ix, 207

Antimeningitis serum:*See* Serum, meningitis.**Antipepsin:**

Relation of, to pepsin, xiv, 535

Antiseptic:

- Surgical, ix, 473
- Urotropin, a urinary, iv, 19

Antiserum: (See also Serum.)

Parameningococcus, xx, 201

Antitoxin:

- Crotalus and moccasin, viii, 614
- Diphtheria, i, 164; i, 537; iii, 513; xi, 241
- , globulin and albumin in, iv, 649; v, 47; v, 67

Antitoxin—continued:

- Diphtheria, in non-toxic horses, i, 543
- , preventive action of, xvi, 216
- , statistics of horses, vii, 176
- Electrical charge of, ix, 86
- Globulin in relation to, v, 47
- Snake, ix, 18

Antitrypsin:

Serum, xix, 459

Antivenin:

Snake, ix, 18

Aorta:

- Aneurysm of, iii, 371
- Calcification of, viii, 322
- Elastic fiber degeneration of, viii, 388
- Intubation of, xvi, 17
- Occlusion of, xi, 373
- Patching of, xii, 139; xiv, 126
- Sclerotic, bone in, viii, 365
- Transplantations of, xv, 389

Appendix:Lesions produced by *Oxyuris vermicularis*, xv, 225**Arsenic:**

Absorption from salvarsan, xvii, 83

Arsenobenzol:*See* Salvarsan.**Arterial hypertension:***See* Hypertension; *also* Blood pressure.**Arteriosclerosis:**

- Adrenal lesions and, x, 735
- Aortic, viii, 365
- Experimental, viii, 74; viii, 504
- Theory, mechanical, of, xiii, 24

Arteritis:

In the young, iv, 541

Artery: (See also Aorta.)

- Calcification of, viii, 322; x, 276
- Coronary, blood flow of, as

Artery—continued:

- affected by various agents, xii, 575
- Coronary, circulation of, ii, 13
- , closure of, i, 46
- , epicardial fibroid nodules on, iv, 245
- , epinephrin action on, xv, 404; xvi, 532
- Endothelial separation in smaller arteries, vii, 183
- Latent life of, xii, 460
- Occlusion of, xi, 373
- Pulmonary nerve fibrillæ in, xiv, 322
- , operations on sigmoid valves of, xx, 9
- Radial, tracings of, xiv, 339
- Sclerotic, bone formation in, x, 354
- Shock, arteries in, xv, 415
- Transplantations, xvi, 169

Arthritis:

- Deformans, complement fixation tests in, xx, 52
- Experimental, streptococcus, xix, 444

Aschoff:

- Nodules of, in rheumatic fever, xix, 417

Ascites:

- Adrenalin, sodium and calcium chloride action on, xi, 470
- Calcium and sodium chloride action on, xi, 291
- Myocarditis in relation to, xi, 480

Asphyxia:

- Resuscitation of dogs killed by, viii, 713

Aspiration:

- Foreign material, xiii, 626

Atherosclerosis:

- Experimental, xx, 93

Athrepsia: xiii, 511; xiv, 316**Atresia:**

- Ureter, ix, 71; ix, 82

Atrophy:

- Acute yellow, of liver, ix, 627; xii, 367
- Fat, iii, 293
- Kidney, ix, 82

Auditory nerve:

See Nerve.

Auricle:

- Faradized auricles, activity of, xviii, 704
- —, vagus influence on, xvii, 429
- Fibrillation, xvi, 395
- Vagus influence on conduction between ventricles and auricles, xviii, 739

Auto-antibody:

- Formation, xi, 695

Autograft:

- Parathyroid, xv, 205

Auto-inoculation:

- Spleen, xii, 29

Auto-intoxication:

- iv, 1

Autolysis:

- Hemosiderin content of rabbit liver during, xii, 623
- Pigment formation in liver during, xvi, 607
- Rate of aseptic postmortem, xi, 55
- Spleen changes during, xv, 429

Axis-cylinder:

- Regeneration and degeneration, *in vitro*, xvii, 182; xviii, 412

B**Bacillus:**

- Acid-resisting, v, 205
- acrogenes capsulatus*, observations concerning, i, 5
- bifidus communis*, pleomorphism and pleobiosis of, xii, 182
- Bordet-Gengou, and pertussis, xi, 41
- capsulatus*, in pneumonia, iv, 169

Bacillus—continued:

- Capsules, celloidin, containing bacilli, v, 635
 Cholera, hog. *See* Cholera.
coli communis, observations on, v, 353
 —, diplococcoid form of, iv, 349
 —, environment, influence of, on, ii, 549
 —, method for, ii, 677
diphtheriæ. *See* Diphtheria.
dysentericæ. *See* Dysentery.
enteritidis, observations on, v, 353
friedländeri, in pneumonia, iv, 169
icteroides, biological characters of, v, 215
influenzæ. *See* Influenza.
lactis aerogenes, observations on, v, 353
lepræ. *See* Leprosy.
mallei, vascular lesions produced by, ix, 241
megatherium, pneumonic lesions caused by, xviii, 543
mortiferus, vi, 519
mucosus capsulatus, gaseous emphysema due to, v, 139; v, 389
 Paratyphoid. *See* Paratyphoid.
pertussis. *See* Bordet-Gengou.
pneumoniæ. *See* Pneumonia.
pyocyaneus, iii, 595; iv, 627
pyogenes filiformis, study of, i, 211
 Septicemia caused by capsulated bacilli, iv, 149
tuberculosis. *See* Tubercle bacillus.
typhi abdominalis. *See* Typhoid.
typhosus. *See* Typhoid.
X, biological characters of, v, 215

Bacteria:

- Acid produced by, iii, 651
 Anaerobic, method for plating, viii, 542
 Complement fixation test for lues, in relation to, xiii, 521
 Differentiation of, decolorized by Gram's stain, ix, 381
 Estimation, method of, in circulating blood, xx, 237
 Fecal, determination of, xiv, 433
 Gentian violet action on closely related, xvi, 822
 Glycerin, action of, on, vii, 725
 Growth of, iv, 235
 — —, on aniline dye media, xix, 20; xix, 501
 — —, on salt-free media, vii, 111
 Indol production by, ii, 543
 Mass cultures, vii, 223
 Self-purification of streams from, v, 271
 Spleen inoculation of, iii, 533
 Streptothrices in relation to, xvii, 99
 Water containing, iv, 609
Bactericidal action:
 Fasting, bactericidal action of blood in, iv, 131
Bacteriology:
 Distemper, xvii, 511
 Pertussis, vii, 335
 Pneumonia in infancy, vi, 391
 Rheumatic fever, ix, 186
 Sputum in common infections, xiii, 638
Bacteriolysin:
 Leukocytic, relation of, to body fluids, xvii, 409
Bacteriolysis:
 Proteolysis in relation to, xx, 321
 Snake venom, vi, 277
Band:
 Metal, for occlusion of arteries, xi, 373

Barium sulphate:

Absorption in syphilis,
xiii, 217

Base:

Hexone bases, vii, 292; ix, 520

Beat:

Heart, ii, 391
—, disturbances in, xviii, 556

Bile:

Circulation, effect of bile on,
xi, 673
Fat content of, in relation to
liver, xix, 234
Injections, intraperitoneal,
xiv, 445
Metabolism, as influenced by,
v, 513
Pancreatitis caused by,
viii, 167
Phlorhizin, influence of, on,
ii, 107
Pigment, change of hemo-
globin to, xvii, 612
Salts and blood serum,
xi, 786
Secretion and composition of,
ii, 49
Toxicity of, vii, 280; viii, 127

Bile duct:

Melanoma of, x, 465

Biochemistry:

Bacillus lepræ, biochemistry
of, xiv, 606

Biology:

Diplococcus intracellularis, bi-
ology of, ix, 105

Bird:

Hematozoan infections of,
iii, 117
Hemocytozoa of,
iii, 79; iii, 103

Bladder:

Elimination through mucosa
of, xviii, 310

Blastomycetes:

Dermatitis caused by, iv, 261
Pseudolupus caused by,
iii, 53

Block:

Heart, viii, 32
—, physiology of,
vii, 676; viii, 8
—, — and pathology of,
xvi, 25

Blood:

Absorption of coagulated
serum, iii, 573
Adrenalin in,
xiv, 377; xvi, 502
Agglutination, in pertussis,
vii, 335
Antityphoid immune bodies in,
xvi, 315
Bacteria in circulating, method
of estimating, xx, 237
Bactericidal action of, in fast-
ing, iv, 131
Calcium in, in tetany, xx, 149
— chloride, etc., effect upon
dilution of, xi, 627
Carbon dioxide in, in pneu-
monia, xvi, 701
Catalytic activity of,
xi, 200; xii, 1; xii, 115;
xii, 755
Cells, red. *See* Erythrocyte.
—, in trichinosis, iii, 315
—, white. *See* Leukocyte.
Chemistry of,
xvi, 719; xvii, 444
Coagulation, in phlebitis,
x, 271
—, second, vii, 173
— time in pneumonia, xvi, 693
Composition of, after ne-
phrectomy, iv, 117
Corpuscles, effect on titrations
of inequality of sensitization
of, xv, 470
Cultures in septicemia, pneu-
monia, and meningitis,
iv, 425
Cytotoxic sera producing
changes in, vii, 119
Destruction and regeneration
of, in relation to spleen,
xvi, 363; xvi, 375; xvi, 758;

Blood—continued:

- xvi, 769; xvi, 780; xviii, 487; xviii, 494; xviii, 665; xx, 19; xx, 108; xx, 122
- Dextrose, effect of, on,
 - viii, 240
- Estivo-autumnal parasite in,
 - xiii, 263
- Fibrinogen of, in chloroform poisoning,
 - xiii, 136
- Flow in feet,
 - xviii, 354; xviii, 372
- in hands in anemia,
 - xviii, 113
- through coronary arteries and veins,
 - xii, 575
- in relation to odors, vapors, and mental work,
 - i, 71
- Hemolysis, blood in,

 - iii, 371
 - Variola, ameboid bodies in blood in,
 - ii, 515
 - Venom activators of,
 - ix, 436
 - , snake, action of, on,
 - vii, 191
 - Venous blood flow, changes in, from amyl nitrite,
 - xii, 278
 - Vessels, heterotransplantation of,
 - ix, 226
 - Viscosity,
 - viii, 59; viii, 240
 - Water gas producing changes in,
 - xii, 282
- Blood pressure:**
- Agents, various, effect of, on,
 - xii, 575
 - Bile, effect of, on,
 - vii, 280
 - Cardiac rhythm and,
 - xix, 1
 - Epinephrin, effect of, on,
 - xi, 641; xvi, 541
 - Hemorrhage, blood pressure after,
 - vii, 1
 - Kidney extract and serum, effect of, on,
 - xi, 430

Blood pressure—continued:

- Organ extracts, effect of, on, ix, 606
- Pulse pressure in relation to, x, 484
- Respiratory waves of, xv, 370
- Venous, changes in, from amyl nitrite, xii, 278

Body:

- Ameboid, in blood, in variola, ii, 515
- Amylaceous, in syphilitic bone tumors, v, 111
- Crystalline, obtained from digestion of gelatin, viii, 180
- Fuchsin, xii, 533
- Heat-sensitive bodies, anti-complementary, in serum, xiii, 31
- Immune, antityphoid, xvi, 315
- Negri bodies in rabies, xvii, 29
- Skin and blister fluid bodies from scarlet fever and measles, vii, 343
- Tartrates, xviii, 317
- Trachoma, xviii, 572
- Weight in relation to gastrointestinal tract, xix, 339
- — — — heart, x, 521

Bone:

- Calcium content of, xx, 499
- Formation in sclerotic arteries, viii, 365; x, 354
- in transplantable new growth of fowl, xvii, 466
- Syphilitic tumors of, v, 111
- Tuberculosis of, xvi, 432; xvii, 362

Bone marrow:

- Enzymes in, vii, 759
- Formation in sclerotic aorta, viii, 365
- Growth of chicken, *in vitro*, xvii, 43
- Sclerosis, x, 559
- Splenectomy, changes in bone marrow after, xx, 19

Bordet-Gengou:

Bacillus. *See* Bacillus.

Boric acid:

See Acid.

Bouillon:

- Cultures, diphtheria bacilli, iv, 373
- Plain, sterile, reaction of lungs to, xvii, 424
- Reaction [Theobald Smith], xi, 403

Brain:

- , effect upon adult mammalian cells, xx, 554
- Gentian violet effect on, *in vitro*, xx, 545
- Grafting, heteroplastic, xix, 513
- Growth in acid media, xviii, 183
- of displaced normal, xvi, 493
- , outside of organism, xv, 516; xvi, 421
- , regulation of, xiii, 562
- Indophenoloxydase content of, infected with pneumococcus, xix, 303
- Intramuscular, absorption from, vii, 59; xiii, 328
- Kidney, reduction of, x, 745
- Liver, hexone bases of, vii, 292
- Lymphoid, rôle of, in resistance to tuberculosis, xx, 397
- Mammalian, adult, survival and transplantability of, xix, 121
- , implanted in chick embryo, xix, 181
- Maternal, placental, and fetal, in chloroform anesthesia, xv, 246
- Pancreatic, action of, on adipose, iii, 585
- , injection of, ix, 385
- Proteolysis of tissue infected with pneumococci, xix, 309
- Sarcomatous, cultivation of, *in vitro*, xx, 140
- Sera as culture media for, xv, 397
- Solution of abscess, viii, 536
- Specificity, xvii, 482; xix, 181; xix, 513
- Technique for cultivation of, xv, 393

Tissue—continued:

- Transplantability of, xvii, 482
- Transplantation of tumor and normal, xii, 344
- Tuberculous, iii, 21
- , enzymes in, x, 645
- Tumor, changes in growing, xvi, 149

Titration:

- Inequality of sensitization of corpuscles, effect on, xv, 470

Tolerance:

- Sugar, in tetany, xix, 89

Tonicity:

- Iso-hemagglutination, tonicity in, xiii, 536

Tooth:

- Calcium content of, xx, 499

Toxicity:

- Bile, vii, 280; viii, 127
- Diphtheria toxin, iii, 513
- Gentian violet, xviii, 579
- Magnesium salt, after nephrectomy, ix, 298
- Protease, xviii, 591
- Serum, normal, xiv, 25
- Urine, normal, v, 315
- Venom, snake, vi, 277

Toxicology:

- Amanita phalloides*, viii, 437

Toxin:

- Bacillus typhosus*, xvii, 453
- Cyto-, specificity of, xix, 277
- Dextrose in relation to diphtheria, iv, 373
- Diphtheria, i, 164; i, 543; iii, 513; xi, 241
- Duodenal loop, xvii, 286; xvii, 307
- Electrical charge of, ix, 86
- Kidney, nitrogen retention after injection of, xix, 270
- Pneumococcus, xvi, 644; xx, 346
- Sero-, xix, 480
- Staphylococcus, effect on kidney, i, 613
- Tetanus, in blood serum, xi, 656

Toxin—continued:

- Tetanus, effect of eosin on, viii, 1
 Venom, snake, ix, 18

Trachoma:

- Bodies, cultivation of, xviii, 572

Tracing:

- Heart, xiv, 339; xiv, 351
 Polygraph and micrograph, xvi, 280
 Pulse, iv, 327

Transfusion:

xiii, 425

Transition:

- False, between normal and cancerous epithelium, xvii, 494

Transmission:

- Disease, by ovarian infection in fowl, xix, 552
 Poliomyelitis, by insects, xvi, 850
 Scarlet fever, xvii, 517

Transplantability:

- Carcinoma, xiii, 604
 Tissue, adult mammalian, xix, 121
 —, to embryo, xvii, 482

Transplantation: (*See also* Re-plantation.)

- Aortic, xv, 389
 Artery, xvi, 169
 Blood vessel, ix, 226
 Carcinoma, x, 36; xiii, 234
 Kidney, x, 98
 —, causing calcification of arteries, x, 276
 — and spleen, xii, 146
 Pancreatic, in spleen, xvii, 252
 Parathyroid, xi, 175
 Tumor, xvi, 629
 — and normal tissue, xii, 344

Tremor:

- Graphic study of, ii, 301

Treponema:

- calligyrum* from condylomata, xvii, 89
macrodentium, xv, 81
microdentium, xv, 81

Treponema—continued:

- mucosum* from pyorrhea alveolaris, xvi, 194
pallidum. *See Spirochata pallida*.

Trichinosis:

- Studies on, iii, 315

Trichocephalus:

- trichiura*, lesions produced in appendix by, xv, 225

Trichophytin:

- Reaction, xii, 435

Trout:

- Brook, thyroid carcinoma of, xii, 311; xiii, 455; xix, 70
 —, — hyperplasias of, xix, 376

Trypanosoma:

- hippicum*, immunization to, xvii, 582
 —, infection, xv, 365; xv, 367
lewisi, anomalies of, xix, 562
 —, pathogenicity of, xix, 406

Trypanosome:

- Immunity reaction, xi, 802
 Virus inoculations, xiv, 526

Tubal disease:

- See* Disease.

Tube:

- Fallopian, nodular disease of, ii, 347

Tubercle bacillus:

- Adenitis, cervical, tubercle bacillus in, xii, 82
 Atypical forms of, xi, 403
 Bovine and human, iii, 451; xvi, 432
 —, effect of introduction into lungs, xvii, 527
 Ferment-inhibiting substances in, xix, 251
 Intraperitoneal lysis of, xviii, 601
 Miliary, histogenesis of, xix, 283
 Milk containing, iv, 217
 Necrosis produced by, ii, 657

Tubercle bacillus—continued:

- Spleen, function of, in infection with, xix, 187
- Sputum containing, iii, 363

Tuberculin:

- Passive hypersensitiveness to, xv, 149
- Reaction, ophthalmic, x, 232; x, 594

Tuberculosis:

- Adrenal. *See* Disease, Addison's.
- Bacillus. *See* Tubercle bacillus.
- Bone and joint, xvi, 432; xvii, 362
- Cornea, xx, 269
- Enzymes in, x, 645; xi, 686
- Ferments in tuberculous caseous material, xix, 383
- Intestinal, vi, 23
- Leukocyte injections in, x, 419
- Lymphoid tissue, rôle of, in resistance to, xx, 397
- Pseudo-, iii, 435
- Pulmonary, experimental, xvii, 527

Tufnell:

- Method, iii, 371

Tumor: (See also Neoplasm.)

- Avian, susceptibility of alien host to, xx, 413
- Benign (lymphoma), iv, 559
- Cells, implanted, resistance to, xviii, 416
- , sarcoma, fowl, xiii, 397
- Chicken, filterable agents producing, xix, 52
- , spontaneous, xix, 570; xix, 577
- , transplantable, xviii, 651
- Diet. influence of, on, xx, 433
- Elastic fibers in, v, 131
- Embryonic tissue in relation to, xiii, 239
- Growth energy, decrease in, xiii, 234

Tumor—continued:

- Growth, immunization against substances inhibiting, xx, 522
- , resistance to, xv, 163
- , substances affecting, xx, 180
- , — inhibiting, xx, 542
- Histological methods, x, 575
- Immunity, xvii, 482
- , to transplantable chicken, xx, 419
- Inoculation into organs, xvi, 155
- Lecithin and cholesterol, influence on, xvii, 344
- Malignant, cultivated *in vitro*, xiii, 571
- , metastases in, xiv, 148
- Nerves in, ii, 1
- Neurocytoma or neuroblastoma, xii, 556
- Producing agent, resistance to, xviii, 416
- Purines and purine metabolism of tumors, xviii, 512
- Secondary localization of, xx, 404
- Syphilitic, bone, v, 111
- Thymus, x, 308
- Tissue changes in growing, xvi, 149
- Transplantable, x, 811
- Transplantations, xvi, 629
- Transplanted, xii, 344
- White mouse and white rat, xvi, 155

Turpentine:

- Thoracic duct lymph after injecting oil of, xvi, 139

Typhoid:

- Abscess, ix, 1
- Anti-, inoculation, xvi, 315
- Bacillus, aniline dye medium for, xix, 501
- , experimental infection with, iv, 189
- , method for, ii, 677
- , observations on, v, 353

Typhoid—continued:

- Bacillus, toxic split products of, xvii, 453
- , toxins and endotoxins of, xvii, 117
- , in urine, iii, 349
- Gall-bladder infection, xx, 573
- Histology of, iii, 611
- Spinal cord in, iv, 189
- Urotropin in, iv, 19

U**Ulcer:**

- Gastric, viii, 181

Uncinaria:

- Hemolysin in, xi, 331

Uncinariasis:

- Anemia of, xi, 331

Uranium:

- Nitrate, influence of lesions of, upon absorption, xii, 487

Ureter:

- Atresia of, ix, 71; ix, 82
- Ligation of, circulation of kidneys following, xx, 191

Uric acid:

- See* Acid.

Uricolysis:

- Salicylic acid, influence of, upon, ix, 312

Urine:

- Adrenalin, sodium and calcium chloride effects on, xi, 470
- Albumin, composition of, in, xiv, 298
- Calcium and sodium chloride effects on, xi, 291
- Depressor substance of dog's, xii, 128
- Myocarditis, influence of, on, xi, 480
- Normal, toxicity of, v, 315
- Typhoid bacillus in, iii, 349

Urotropin:

- Value of, iv, 19

Uterus:

- Action of glandular extracts on, xi, 326

Uvula:

- Striated muscle in, iii, 549

V**Vaccine:**

- Distemper, xvii, 511
- Dysentery, xiii, 486

Vagus:

- Action, xv, 14
- Anaphylaxis, effect on, of section of, xii, 638
- Differences between vagi, xv, 49
- Faradized auricles, influence on, of, xvii, 429
- Kidney, influence on, of, xiii, 308
- Left, influence of, on conduction between auricles and ventricles, xviii, 739
- Morphine effect on heart after removal of one, xviii, 715
- Stimulation, xiv, 217; xv, 14; xvi, 732

Valve:

- Sigmoid, of pulmonary artery, operations on, xx, 9

Vapor:

- Blood flow, effect of vapors on, i, 71

Variola:

- Ameboid bodies in blood in, ii, 515

Vascular:

- See* Vein.

Vasoconstrictor:

- Properties of serum, xvi, 103

Vasodilator:

- Properties of serum, xvi, 103

Vater:

- Diverticulum, melanoma of, x, 465

Vegetable:

- Protein, rotary properties of, i, 304

Vein:

- Acute nephritis, reactions of veins in, xii, 196

Vein—continued:

Blood flow through veins, effect of various agents on,

xii, 575

Endothelial separation in veins,

vii, 183

Gangrene and Raynaud's disease, veins in,

v, 91

Lesions, *Bacillus mallei* producing,

ix, 241

—, pneumococci injections producing,

xvi, 443

Meningitis, tuberculous, vascular changes of,

i, 112

Portal, anastomosis between vena cava inferior and,

vii, 163

Vena cava inferior:

Anastomosis between portal vein and,

vii, 163

Venom:

Activators,

viii, 87

— of blood,

ix, 436

Crotalus, glomerular lesions caused by,

xi, 532; xviii, 149

Snake,

ix, 18

—, action on blood,

vii, 191

—, eosin and erythrosin action on,

viii, 252

—, hemolysis of,

vi, 277

Ventricle:

Contractions,

ii, 13

Left vagus, influence of, upon conduction between auricle and,

xviii, 739

Viability:

Pneumococcus,

vii, 592; xviii, 584

Vibrio:

Cholera,

xix, 581

Virulence:

Carcinoma,

viii, 481

Microorganisms,

vii, 229

Pneumococci in lobar pneumonia,

xvi, 680

Proteotoxins and,

xx, 582

Trypanosoma lewisi,

xix, 562

Virus:

Poliomyelitic, blood in relation to,

xix, 223

—, infection,

xiv, 116

—, insect transmission of,

xvi, 850

—, localization of,

xx, 249

—, penetration into cerebro-spinal fluid,

xix, 411

Trypanosome,

xiv, 526

Viscera:

Changes in, in superficial burns,

ii, 501

Visceral organism:

See Organism.

Viscosity:

Blood,

viii, 59; viii, 240

Vital staining:

Ehrlich's method for,

i

W**Wassermann:**

Reaction, antigens in,

xviii, 75

—, Noguchi's modification of,

xii, 726

—, — system compared with,

xiv, 235

—, proteins, lipoids and salts in relation to,

xi, 84

Water:

Bacteria in,

i, 419; ii, 535; iv, 609

Distilled, complement inactivated by,

xiii, 652

—, influence of, on wounds,

xiii, 559

Drinking, studies on,

xii, 388

Gas. See Gas.

Wave:

Diastolic, of venous pulse,

xii, 257

Respiratory, of blood pressure,

xv, 370

Waxy degeneration:

See Degeneration.

Weight:

Body, in relation to gastro-
intestinal tract, xix, 339
Heart and body, x, 521
Stomach contents and cecum,
xi, 36

White blood cell:

See Leukocyte.

Whooping cough:

See Pertussis.

Willis:

Circle of, function of, xv, 348

Winking:

Reflex, ii, 35

Witte:

Peptone, poisoning, xii, 586

Work:

Mental, effect of, on blood
flow, i, 71

Wound:

Cicatrization, *in vitro*,
xiii, 422

Wound—continued:

Heart, iv, 479
Skin, influence of distilled wa-
ter on, xiii, 559

X**X-ray:**

See Roentgen ray.

Y**Yaws:**

See Frambesia.

Z**Zenker:**

Degeneration of striated mus-
cles, xi, 1

Zymogen:

Amylolytic ferment, ii, 465

Zymogenes:

See *Micrococcus zymogenes*.
